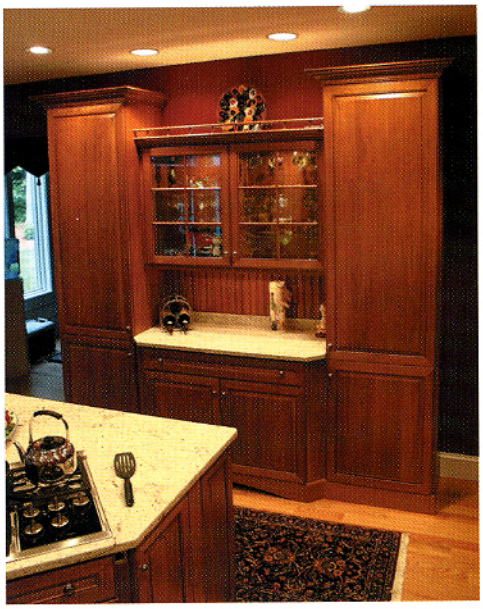
A complete home restoration culminated with a much needed kitchen makeover. The new design includes extensive counter space with specific zones for prep, cooking and clean up, in addition to ample storage. The center island serves multi-purposes with lots of space for cooking as well as buffet serving for entertaining. Roomy cabinets for dishes at the end of the island and bakeware on the far side keep this family of five well organized.

A custom hutch provides additional storage. With its glass doors, wood countertop and beaded backsplash, this furniture-style piece really completes the overall look of the kitchen.



SPECIAL DESIGN FEATURES: Custom hutch with finished furniture look; large functional island.

PRODUCTS USED: Adelphi cabinetry, Scottsdale style, cherry with Brown glaze; Sub-Zero refrigerator; Thermador cooktop and oven; White Romano granite countertops; Glacier White DuPont Corian sink; Whitehaus faucet.

PHOTOGRAPHY: Scott Sherman
