This 16- by 20-foot space with its 10-foot ceiling and majestic windows afforded many opportunities for a kitchen high on style. Working side by side, the homeowner and kitchen designer created a space that is both stylish and highly functional. Richly stained cherry cabinets were stacked to heights over 8-feet and accented with craftsmen style glass doors. Their thoughtful arrangement created several efficient work centers. The prep island doubles as a place for eating and socializing. Detailed crown moldings, gorgeous granite countertops (and backsplash), state-of-the-art appliances, well-designed lighting and carefully selected accessories add to the enjoyment of the space.
